

The Institute for Strategy, Technology and Organization offers

Research Internships

(two months)

for students in Business, Economics
or Information Systems

For the position of a research intern we are looking for active and motivated students, who have an above-average interest in research and possess basic knowledge in quantitative research. The internships' topic is an active collaboration in a research team consisting of institute staffs as well as national and international trainees that work on a common research project.

Your profile:

- Bachelor or Master student in the last year in Business, Economics or Information Systems
- Good command of the English language
- Skills in econometrics and STATA / Python, PHP and MySQL are of advantage
- Eight weeks time to collaborate in a project (the exact date will be arranged with the research assistants)

We provide you:

- Assistance in a research project of your own choice
- Access to databases and literature sources
- Preparation for your own thesis
- for LMU-students: 1.500 € reward for the whole internship
- for external students: flight, accommodation and day rate

Offered areas:

- Entertainment and media industries (Music, Movies, Videogames)
- Building an intranet-based administrative tool for the datasets at ISTO

Please submit the following application documents to us:

- Letter of motivation including your choice of the research project, you want to contribute to
- Curriculum vitae and transcript of records
- In case you have not attended any course at ISTO: name(s) of one or two professors, who can recommend you

Closing date for applications: May 31, 2012

Please send your documents electronically to Christian Peukert (c.peukert@lmu.de) or via mail to:
