

We are looking for a student research assistant (m/w)

(16hours/week for 2 months)

at the Institute for Strategy, Technology and Organization.

For the data collection for one of our ongoing research projects, we are in need of your active support in April and May 2017.

You should have time to work at least 16h/week in April and May 2017. It is possible to support the project longer than 2 months and work for 8h/week from June 2017 onwards.

Your role:

- You will support us in the data collection for one of our ongoing research projects in the automotive industry.
- You will play an active role in contributing ideas to the project.
- You can support the project and Institute in ongoing tasks (such as data analysis, the organization of conferences and teaching) from June 2017 onwards.

Your advantages:

- You will have the unique opportunity to be actively involved in a research project and contribute your ideas.
- You gain detailed insights into academic research and work with a motivated young team of researchers.
- You can apply and improve your English language skills.

Your qualifications:

- You are reliable, independent and motivated.
- You have an excellent command of English.
- You are interested in technology and academic research.
- Command of statistical software (such as Stata) is advantageous though not necessary.
- Ideally, your field of study is business administration, economics, English language and/or literature studies or mechanical engineering.

Interested? Please send your complete application documents (letter of motivation, CV & certificates) to Johanna Glauber (j.glauber@lmu.de) **until Sunday, 26.03.2017**. We look forward to receiving your application!
